

# Gifting Support Documents

Giving a Gift of X39 can change someone's life and your business! Some feel it fast, some slow, but it always immediately begins working at a cellular level from the very first day. This is a powerful and proven way to open a meaningful discussion and evaluation of X39, and if done properly, will constantly result in new Customers and Distributors.

CA: <https://livingbetterteamca.go.customprintcenter.ca/>

### 2) The X39 Gift of Good Health Flyer

This simple downloadable, 2-color, 2-sided print-at-home flyer clearly outlines X39's benefits, usage instructions and on the back side contains the Health Tracker for recipients to document their before and after results.

If you use this flyer, consider also including the LifeWave X39 Tri Fold Brochure (10 for \$3.50 in your back office store) and possibly one of the Stem Cell article reprints in the Distributor => Resources section of NittyGritty101.

**The Gift of Good Health**  
Activate Your Body's Own Stem Cells  
to Help Support a Healthy Immune System

**Historical Breakthrough in Affordable Stem Cell Technology**

- As we age, our stem cells decline in their ability to heal our bodies
- Continued use of LifeWave's X39® stem cell activation patches provides the body with a level of health and vitality that many have not experienced in years... possibly decades
- The secret! An exclusive, patented and proven phototherapy non-transdermal patch technology
- LifeWave's X39® is the result of over 90 clinical studies and 20 years of research
- When applied to or near the body, the X39® phototherapy patches are activated by the infra-red light emitted from your body
- X39® then emits back a very targeted and specific light frequency that is clinically proven to signal the body to elevate GHK-Cu copper peptide
- GHK-Cu copper peptide has been clinically proven to activate your body's own stem cells
- LifeWave is the world's first and only company offering this patented approach to activate stem cells
- All for the cost of a cup of coffee per day!

**Typical Health Benefits**

<ul style="list-style-type: none"> <li>Rapid minor pain relief</li> <li>Reduced inflammation</li> <li>Better sleep</li> <li>Improved energy and vitality</li> <li>Enhanced sports performance</li> <li>Faster recovery from exercise</li> </ul>	<ul style="list-style-type: none"> <li>Improved skin appearance</li> <li>Improved hair quality</li> <li>Rapid wound healing</li> <li>Improved mental clarity</li> <li>Relief from many other health and age-related issues</li> </ul>

**A Safe Way to a Healthier You**

Adult stem cells play a critical role in our overall health and longevity. In 2006 the *New-England Journal of Medicine* stated that the number one indicator of wellness is directly correlated to the number of adult stem cells in the blood stream.

What are stem cells? They are cells with the potential to develop into any kind of cell needed. They have the incredible ability to heal and repair any organ or tissue. All stem cells share at least these two characteristics: they can make identical copies of themselves and, unlike other cells, they self-renew as stem cells or differentiate into other kinds of cells.

While our need for adult stem cells increases dramatically as we age, the older we get, the fewer of these are released into our bloodstream. A teenager has approximately 100 million cells in the body of which about one billion are circulating adult stem cells.

- At age 30 this number has dropped to 800 million
- At age 40 this number has dropped to 750 million (a 25% reduction)
- At age 50 this number has dropped to 600 million (a 40% reduction)
- At age 60 this number has dropped to 500 million (a 50% reduction)
- At age 70 this number has dropped to 400 million (a 60% reduction)
- At age 80 this number has dropped to 300 million (a 70% reduction)

**powerful healing cells naturally mold themselves to heal your body on a cellular level. The advancements in stem cell therapy in the past two decades are completely rewriting what we think we know about human healing and the power of our own body to evaluate illness, injury and chronic conditions.**

*—The Healing Miracle*

There are hundreds of stem-cell therapy clinics worldwide and over 500 in the US. These clinics offer interventions for sports injuries along with various conditions like autism, multiple sclerosis, COPD, cancer, and Alzheimer's disease. As with other medical procedures, the results vary greatly. Stem-cell therapy is still considered experimental and may not be covered by insurance. Increasing the number of circulating adult stem cells has the potential to regenerate areas in the body already damaged. Whether we have had an injury, illness, or are experiencing signs of aging, stem-cell activation can quickly transform the quality of life. Stem-cell therapy can be considered

**You can be anything you want to be when you grow up.**
